

Under Muscle or Over Muscle ?

Would you go for Under the Muscles implants ? or Over the Muscles Implants ? What are the Pros and Cons of each type of breast augmentation ? Often choosing over or under is a decision that is done by the physician and the patient, and each situation recommends a certain procedure. There is no method better than the other in general

 Under the Muscles Breast Augmentation More dramatic - longer recovery

Recommended for very small breasts (AA - A)Can be done for small-moderate implant size (200cc - 325 cc...)Gives a more natural look for those starting with smaller cup sizes

Over the Muscles Breast AugmentationHas a much shorter recovery time Less dramatic and leaves you less sore

Give more a "Fake Boobs" look if you start with smaller breasts

Recommended for deflated post-pregnancy breastsRecommended for larger implant sizes and those starting with medium-large breasts naturally
