

Breast Augmentation for Exotic Dancers

Exotic Dancers or strippers are probably the category of women with the biggest percentage of Breast Implants

It is well known that dancers with bigger breasts will get most attention and will make more income out of it. If you take the Sapphire club in Vegas, maybe 70 % of the dancers have had implants in. Some have huge implants which gives like a 34DD cup size on a 105 lb frame. Cup sizes go up to E, F maybe G. However we do see these past few years an increasing number of "skinny" dancers, ultra-slim exotic dancers with very few meat on their skin. The period of the mega breasts of the nineties with the likes of Minka, Lisa Lipps and others is over for good
